

Enable and secure your mobile workforce with the power of AI

IBM® MaaS360® with Watson™ is a unified endpoint management (UEM) solution that transforms the way that organizations support users, apps, content, and data across every type of device. Its open, cloud-based platform integrates with preferred security and productivity tools, allowing modern business leaders to derive immediate value.

What makes MaaS360 a perennial market leader?

Wide-ranging AI capabilities

The only UEM platform that leverages AI to deliver contextually relevant security insights **for administrators and end users – enabling them to be more productive across the entire enterprise.**

Best-in-class SaaS

Speed up time-to-value with the industry-leading cloud-based approach to UEM. Its open platform **enables extensive integrations with your existing infrastructure and apps from leading technology vendors.**

Threat detection and response

Going by the stats, at least one of your devices is currently infected or compromised. MaaS360's enterprise-grade threat defense can detect and automate remediation **on your network and across all your apps and devices.**

Digital trust across all devices

Knowing how employees are using their devices and apps is a direct path to business transformation. Deliver a frictionless pathway to user productivity, and **keep their devices, data, and apps secure with built-in identity and access management (IAM).**

Analysts & customers agree: IBM is a UEM leader

What the experts are saying:

Gartner In its July 2018 Magic Quadrant for Unified Endpoint Management Tools, Gartner named IBM a Leader based on **completeness of vision and ability to execute.**

FORRESTER In The Forrester Wave™: Unified Endpoint Management, Q4 2018 IBM ranks as a leader with the **highest score in the Current Offering category.**

What our customers are saying:

“...our initial setup was simple and pain-free, and our continual conversation has been easy and friendly. **We went from a painful, bureaucratic, overwhelmed system to an easy, customizable, responsive solution.** Our rollout has been seamless ...we gained instantaneous situational awareness on the status of all of our devices.”

- **Chief Technology Officer, US Federal Government, Executive Branch Agency**

MaaS360 solutions

Backed by IBM's industry-leading security ecosystem, MaaS360 is a collection of UEM offerings that help IT and Security leaders consistently manage and secure apps, content, and data for users across all endpoint types.

Essentials Edition

Device Management	Manage iOS, macOS, Android, Windows, and Chrome OS
App Management	Distribute, manage, and protect apps across all devices
Identity Management	Provide conditional access and single sign-on (SSO)
Advisor	With Watson, understand and react to risks in your environment
Policy Recommendation Engine	Gain industry best practices during policy configuration with AI
Container App	An app to separate work from personal data on devices
Mobile Expense Management	Prevent costly overages by managing data usage

Deluxe Edition *(includes Essentials Edition solutions)*

Secure Mobile Mail	Contain and encrypt corporate email, contacts, and calendar
Assistant	Boost end-user productivity with an AI chatbot and voice assistant

Premier Edition *(includes Deluxe Edition solutions)*

Business Dashboards for Apps	App intelligence to understand which apps need prioritization
OS VPN	Preserve native VPN experiences for iOS and Android users
Secure Browser	Safeguard data, boost productivity, and control web access
Gateway for Browser	Access corporate intranet, websites, and web apps without VPN
Content Management	Grant secure access to work docs in an encrypted container
Gateway for Documents	Enable security-rich mobile access to file shares without VPN
App Security	Protect access to enterprise apps and prevent data loss
Gateway for Apps	Deliver seamless access to internal apps and data without VPN

Enterprise Edition *(includes Premier Edition solutions)*

Mobile Document Editor	Empower users to securely create, edit, and save content
Mobile Document Sync	Allow users to synchronize documents across managed devices
Mobile Threat Management	Detect and remediate malware on compromised devices
